

Release September 2011

1. Site specific settings:	3
2. option to register 0 tender or swollen joints	5
3. possibility for site administrators to delete a visit	6
4. report care indicators	7
5. more drugs added to drug report	8
6. Download surgery data.....	9

1. Site specific settings:

The site administrator has the possibility to choose specific site settings for

- CRP
- Weight
- Height

Click the Administrate button, than click "Site settings" in the menu.

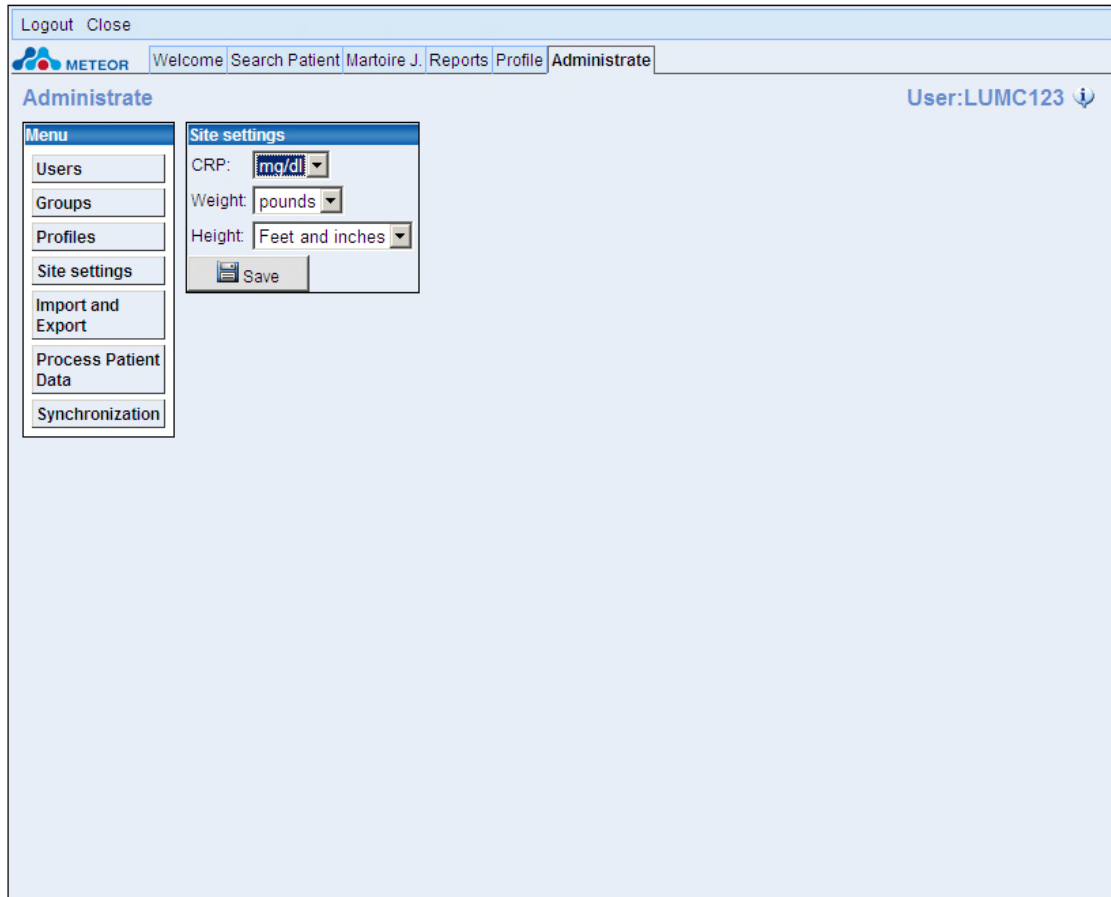

The screenshot shows the METEOR Administrate Users interface. At the top, there is a navigation bar with 'Logout Close', 'METEOR', and tabs for 'Welcome', 'Search Patient', 'Reports', 'Profile', and 'Administrate'. The 'Administrate' tab is active, and the user is identified as 'User: LUMC123'. On the left, a 'Menu' sidebar contains options: 'Users', 'Groups', 'Profiles', 'Site settings' (circled), 'Import and Export', 'Process Patient Data', and 'Synchronization'. The main content area is titled 'Administrate Users' and features a 'Users' list with entries like 'LUMC123', 'system_11', 'LUMC1234', 'LUMC333', 'niels', 'LUMC999', 'niels333', 'lim', and 'ahmkorevaar'. Below the list is an 'Add' button. To the right is a 'User card' form with fields for 'Login name', 'Firstname', 'Lastname', 'Email', 'Home address', 'Organisation: Name', 'Unit name', 'Business category', 'Address', 'Employee', 'Title', 'Type', 'Description', 'Telephone', 'Mobile', 'Home phone', 'Fax', 'Department Nr', 'ID', 'Room Nr', and 'Language'. At the bottom, there is a 'Change Password' section with 'New Password' and 'Repeat Password' fields. 'Save' buttons are present at the bottom of the 'Users' and 'User card' sections.

Drop down boxes are displayed for:

CRP: mg/l or mg/dl

Weight: kg or pounds

Height: cm or feet and inches

After saving the user has to log out and log in to activate the chosen settings.

2. option to register 0 tender or swollen joints

In the DAS screen the user can register with 1 mouse click that the patient has 0 tender and/or swollen joints.

The screenshot displays the METEOR software interface for recording the Disease Activity Score (DAS). The main area is titled "Disease Activity Score (DAS) [visit:2007-09-01]". It features two side-by-side mannequin diagrams. The left diagram, labeled "Tender Joints (53)", has a checkbox below it that is checked and labeled "No tender joints". The right diagram, labeled "Swollen Joints (44)", has a checkbox below it that is unchecked and labeled "No swollen joints". Below the diagrams are navigation buttons: "Prev", "Page 1 of 2", "Next", and "Export". At the bottom, a "Details" section contains input fields for various clinical parameters: ESR (mm/h), TEND28 (0), RAI (0), SDAI, DAS(4), DAS28(4), CRP (mg/dl), SWOL28, Swollen, CDAI, DAS(3), and DAS28(3). There are also "Lock" and "Save" buttons at the bottom right. A left-hand menu includes options like "New visit", "Patient Characteristics", "HAQ", "DAS", "Drugs", "IA Injection", "Surgery", "Free Text", "Overview", "Graphics", "Edit/Print doctors", and "Close". The top navigation bar includes "Logout", "Rheumatology Record", "Close", "METEOR", "Welcome", "Search Patient", "Test T.", "Martore J.", "Reports", and "Profile". The patient name "Patient: 123test Test Test" and user ID "User: LUMC1234" are also visible.

After clicking the button "No tender Joints" the mannequin will become grey and in the boxes Ten28 and RAI a "0" will be displayed. This function also applies for the button "No swollen joints".

3. possibility for site administrators to delete a visit

In case a wrong visit date has been entered and only if no DAS or HAQ data are registered on a specific visit, site administrators have the possibility to delete this visit.

This function applies only for visits created as of September 2011.

For security reasons this functionality is only allocated to site administrators.

Users of that site have to submit a request to delete a visit to their site administrator.

The screenshot displays the METEOR Rheumatology Record interface for a patient named '123test Test Test'. The user is identified as 'User:LUMC123'. The main content area is titled 'Disease Activity Score (DAS) [visit:2007-09-01]' and features two human figures for joint assessment: 'Tender Joints (53)' on the left and 'Swollen Joints (44)' on the right. A confirmation dialog box is overlaid on the figures, asking 'Are you sure you want to delete visit 2007-09-01' with 'Yes' and 'No' buttons. The 'Visits' sidebar on the left shows the date '2007-09-01' with a red 'x' icon, indicating it is eligible for deletion. The 'Details' section at the bottom contains input fields for various clinical parameters: ESR (mm/h TEN28), RAI, SDAI, DAS(4), DAS28(4), CRP (mg/dl SWOL28), Swollen, CDAI, DAS(3), and DAS28(3). Navigation buttons for 'Prev', 'Page 1 of 2', 'Next', and 'Export' are also visible.

Visits that meet those prerequisites are indicated with a red cross behind the visit date, only visible for site administrators.

If the site administrator clicks on this red cross a pop up appears to confirm or cancel.

4. New report “care indicators”

A new report with care indicators is added to the report module.

The screenshot shows the METEOR Reports interface. The top navigation bar includes 'Logout Reports Close' and 'METEOR Welcome Search Patient Reports Profile'. The user is identified as 'User:LUMC1234'. The 'Reports' section shows 'Care Indicators Report' selected. The 'Parameters' panel on the left includes a yellow notification box: 'This report is showing statistics regarding Care Indicators'. Below this, 'Select scope' is set to 'Site', 'Patients with a visit from' is '2010-09-01', and 'Until' is '2011-09-01'. The 'Result' panel displays the METEOR logo and the report title 'Care Indicators Report'. The report parameters are: Scope: LUMC, Patients with a visit from: 2010-09-01, and Until: 2011-09-01. A table shows the following data:

	Number of patients	%
DAS28(4)	16	100
DAS28(4) < 3.2	3	18.8
DAS(4)	16	100
DAS(4) < 2.4	7	43.8
Total number of CRP	18	100
CRP < 10	3	16.7
Total number of ESR	20	100
ESR < 15	13	65.0

At the bottom of the interface are buttons for 'Run', 'Export to Excel', and 'Export to Word'.

The report displays :
% DAS28 (with 4 variables) < 3.2
% DAS (with 4 variables) <2.4
% patients with CRP < 10
% patients with ESR < 15

5. Drug report is updated

The drug report is updated with new drugs.

6. Download surgery data

The download of patient data is updated in a way that surgery data are also included.

```
- <Surgeries>
- <Surgery>
  <SurgeryDate>2011-02-21</SurgeryDate>
  <SurgeryJoint>Left IP</SurgeryJoint>
  <SurgeryType>Synovectomy</SurgeryType>
</Surgery>
- <Surgery>
  <SurgeryDate>2011-02-21</SurgeryDate>
  <SurgeryJoint>Left IP</SurgeryJoint>
  <SurgeryType>Joint Replacement</SurgeryType>
```
